

The Chesterbrook mailbox

- ¾-inch white oak or maple construction
- Rare earth magnet embedded in roof to stay closed
- Mailbox mounting bracket that screws into side of mailbox post rather than the top
- Exposed hardware is stainless steel (door knob, hinge, hinge and damper screws and strap, flag block screws, flag pivot screw, washers and nuts)
- Exterior coated screws used for attaching box pieces
- Countersunk and filled screw holes
- Roof ridge epoxy glued and pegged with oak pegs to reduce moisture pathways
- Potentially removable and replaceable flag mounting block
- Beveled edge at top of flag mounting block to help shed moisture
- Fixed mounting on flag pivot for stability
- Two coats of oil-based primer
- Two coats of approved color paint
- Positive stop for closing door
- Damped stop for opening door
